

MLFTU Live Fire Attack

This training session will cover JPRs listed in NFPA 1001 Standard for Fire Firefighter Professional Qualifications utilizing the Mobile Live Fire Training Unit. The MLFTU is a self-contained live fire trailer that allows fire departments to complete many NFPA 1001 Firefighter I and II requisite skills. The MLFTUs have a flexible configuration that includes four (4) propane-fire props (including a roll-over prop), pre-piped smoke generators, a pop-up second story, three (3) people-doors, several windows and interchangeable interior walls and doors to enhance the training experience.
