

Firefighter Survival

This course teaches the most advanced techniques for firefighter survival. During your training, you will advance your knowledge on such topics as the roles of crew members during a Mayday, diverse search techniques, access, and extrication, varied methods of self-rescue, and locating and removing a downed firefighter from varied locations and situations. Become the most valuable firefighter by perfecting your skills for self-rescue and the rescue of your crew.

This course includes training on:

- Through the floor rescue
- Upper floor bail-outs
- Drags and carries
- Wall Breaches
- Reduced Profiles
